PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center IPIC (DIA). The photographic analysis for this particular report was performed by the Production Center IPIC.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (I) equipment storage maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

25X1A

A small possible military installation covering 25 acres is located in the West Central part of Sokal (Figure 1), adjacent to the Zapodnyy River. This is probably the installation listed in the Bombing Encyclopedia as the Sokal Army Barracks. The installation is built on high ground in the center of a small flood plain and is surrounded by a high stone wall. Buildings within the installation are two barracks, one administration, five storage, one

motor vehicle storage/maintenance and nine support buildings. The installation was covered by KLYHOLE missions between [REDACTED]. No change has been noted since [REDACTED].

An associated small POL storage area contains [REDACTED] POL tanks, one storage building, two support buildings, and possible open storage. It is probably connected with the civilian industry within the area. The area is rail served.

25X1D

25X1D

DESCRIPTION OF INSTALLATION

Railroad Service

A rail spur enters the POL area from the Vladimir Volynskiy-Dobrolyin line.

Road Service

A dirt road enters the installation from the area road network.

Administrative and Troop Housing Areas

Area D, a possible military area, contains

two barracks, one administration, five storage, nine support buildings, and one 195- by 50-foot motor vehicle storage/maintenance building.

POL Storage Area

Area G contains eight POL tanks with the following diameters: two 55 feet, three 35 feet, and three 25 feet. Two support buildings and one storage building are also located in Area G.
